

- 1) "What's holding this up?" Sumana Harihareswara
- 2) Offer a taste or a script Penguicon 2017
- 3) Automation can do more than you think
- 4) People keep dying
- 5) You will get fluent in programming (but not in 1998)
- 6) Go where the cognitive surplus is
- 7) Describe more than you prescribe, and watch out
- 8) Marketing doesn't have to be gross
- 9) "Gift economy of attribution" has landmines
- 10) Liberty is not enough
- 11) FLOSS people aren't all like Seth Schoen
- 12) Maintainership doesn't have to be monolithic
- 13) "Enlightened self-interest" vs. infrastructure
- 14) "Patches welcome" needs to be invitation, not intimidation
- 15) Your teachers don't respect you
- 16) Different people learn differently
- 17) Social infrastructure work is in-credible
- 18) Your obliviousness protects you
- 19) Prejudice, caches, and the power of embarrassment
- 20) Cookie-licking and plins
- 21) Freedom, safety, and opsec CC BY-SA
- 22) Optimal level of criticism is not zero
- 23) The long joy of empowering yourself & others
- 24) The bug tracker vs. the 10x programmer
- 25) Clarity > accuracy, relationships > purity
- 26) Respecting people means accepting mystery
- 27) To be responsible is to be small-c conservative
- 28) No one is Yudhishthira
- 29) Socially constructed things are real (and hard to change)
- 30) Noisy failure vs. the dog that didn't bark
